Huntress Managed Endpoint Detection and Response

Huntress Managed EDR brings the tech *and* the experts to ensure endpoint security does precisely what it should: stop attackers in their tracks.

Top-tier endpoint security shouldn't be a luxury only for the big players with deep pockets. When basic defenses aren't enough, Huntress Managed EDR levels the playing field with a solution tailored for organizations like yours.

We blend cutting-edge tech with expert oversight, offering 24/7 monitoring by seasoned hunters who find, stop, and evict hackers hiding in your environment. We're laser-focused on cutting through the noise and filtering out false positives to surface the real dangers. And when hackers break through? We're on it day and night—isolating and eliminating them before they can mess with your business.

Key Outcomes

Catch What Slips Through the Cracks
Attackers will always find a way in—but when they do, you'll be ready. Our technology surfaces potential threats, leaving hackers nowhere to hide.

Act Only On Validated Threats
No more wild goose chases. We filter out false positives with human validation. So when you get an alert, you can act fast and with confidence.

Enjoy 24/7 Peace of Mind
Relax and enjoy your day off knowing your endpoints are covered. Our 24/7 SOC team has your back, ready to respond to threats around the clock.

Fight Hackers With Hunters
Don't just find hackers, beat them at their own game. Our expert threat hunters track down their every move, removing their footholds and kicking them out for good.

Break Hackers, Not Your Bank
Protect your budget while protecting your endpoints. Our straightforward pricing keeps things predictable—no surprises.

Created By Hackers to Beat Attackers

HUNTRESS

Full Coverage, No Catch:

Huntress Delivers What You Need to Beat Hackers

Many EDR solutions hook you with big promises but hide key features behind confusing subscriptions that stretch your budget and leave you vulnerable. At Huntress, we keep it simple—everything you need is included. Need proof it works? With over 3 million endpoints protected, our 98.8% customer satisfaction and 500+ five-star reviews show we don't just make claims, we deliver results.

	Tech & Human Expertise	24/7 Coverage	False-positive Reduction	Containment & Response	Pricing & Packaging
Huntress	✓ Combines top-notch endpoint tech with our team of experts—handling everything from management to hunting. Hackers don't rest, but neither do we.	✓ Watches your back 24/7 with our global SOC staffed by expert threat hunters who use their sharp insights to slice through the noise and focus on the threats that matter.	✓ Highlights the most pressing threats with strict quality assurance processes that filter out the noise, ensuring you only respond to validated threats.	✓ Quickly isolates hackers and proactively responds before they can disrupt your business, while supporting your team in eliminating their presence and ensuring they never return.	✓ Adopts a single, straightforward package that provides maximum value for your investments and ensures you have everything you need when you need it most.
Other Managed Solutions	✗ Delivers endpoint tech but skimps on the human touch, leaning on automation to save bucks and boost profits—leaving you to staff in-house experts to fill the gaps.	✗ Charges hefty fees beyond their standard packages only to partially monitor your systems with subpar coverage, while disguising simple alert forwarding as "threat hunting."	✗ Drowns you in a sea of alerts with little context, diverting focus from other priorities and, crucially, from the threats that truly demand attention.	✗ Gives hackers extra time to meet their objectives, placing the burden on your team to track down and stop threats that operate with extreme speed and precision.	✗ Sells you low-value services packages and then slaps on pricey add-ons—only to have you realize what's missing when it's already too late.
